 - Sub Committee
- **Rockville Bicycle Advisory Committee**
- **Transportation and Mobility Commission**
- **Community Surveys**

Vision

All residents and visitors to Rockville can choose to safely, comfortably, and conveniently walk or roll throughout the City, because the transportation network and built environment support pedestrian travel and anticipate the needs and abilities of everyone walking and rolling.

Goals

1. **Ensure Accessibility**
2. **Advance Equity**
3. **Increase Walking and Rolling**
4. **Institutionalize Walking and Rolling**

Action Items

- 30 Action Items
- 10 Categories

Action Item Categories

1. The City should update its policies that impact pedestrian transportation to better reflect the needs and concerns of people walking and rolling and to encourage more walking and rolling in Rockville.

Action Item Categories

2. The City should continue to coordinate with the State as it relates to maintaining and improving state roadways in Rockville.

Action Item Categories

3. The City should improve and continue to carry out its sidewalk maintenance program to ensure access for all pedestrians.

Action Item Categories

4. The City shall carry out ongoing pedestrian priority improvements throughout the City to help make walking and rolling a safer, more convenient, and more desirable mode of transportation.

Action Item Categories

5. Sidewalks, pathways, and pedestrian transportation facilities shall be designed to accommodate all people, encourage safe walking and rolling, and provide access throughout the City.

Action Item Categories

6. Shared use paths shall be built throughout the City to supplement the sidewalk network to provide additional safe and convenient pedestrian routes.

Action Item Categories

7. The City shall strive to increase the number of pedestrian connections throughout Rockville to provide more convenient pedestrian access.

Action Item Categories

8. The City should provide marked crosswalks proactively and equitably throughout Rockville, as appropriate.

Action Item Categories

9. The City shall balance the use of public space between the curb and building front to benefit pedestrian travel and activity in the community.

Action Item Categories

10. Street trees should be included as components of a comprehensive pedestrian network.

Schedule - Proposed
